

Using Google Chrome to open Class OneNote

When opening Class OneNote, Google Chrome is the preferred platform. This is an Internet Browser that can easily be downloaded, if it is not already on your computer.

Select "Download and Install Google Chrome"

Download & install Google Chrome

Google Chrome is a fast, free web browser. Before you download, you can check if Chrome supports your operating system and you have all the other system requirements.

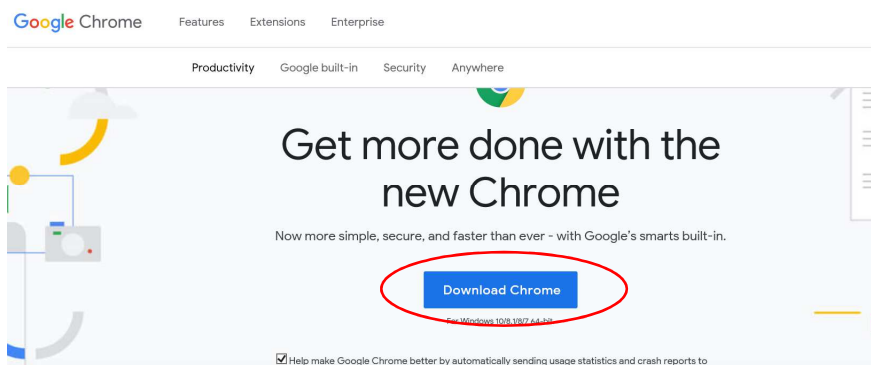

[Computer](#) [Android](#) [iPhone & iPad](#)

Install Chrome on Windows

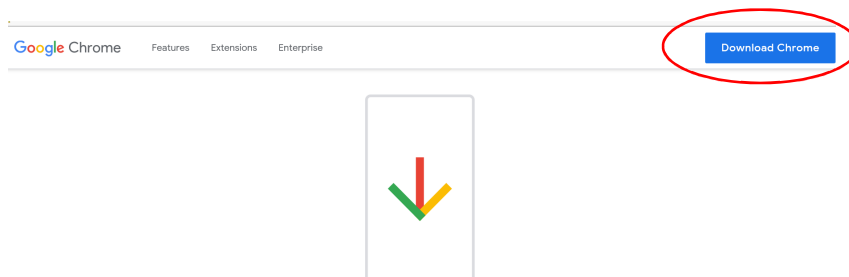

1. [Download the installation file](#).
2. If prompted, click **Run** or **Save**.
3. If you chose **Save**, double-click the download to start installing.
4. Start Chrome:
 - **Windows 7:** A Chrome window opens once everything is done.
 - **Windows 8 & 8.1:** A welcome dialog appears. Click **Next** to select your default browser.
 - **Windows 10:** A Chrome window opens after everything is done. You can [make Chrome your default browser](#).

If you've used a different browser, like Internet Explorer or Safari, you can [import your settings into Chrome](#).

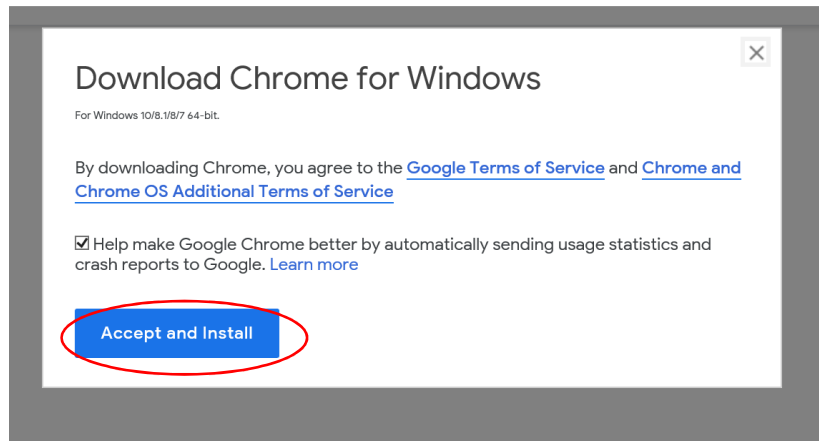

This window will open up. Select Download Chrome.

This page will open.

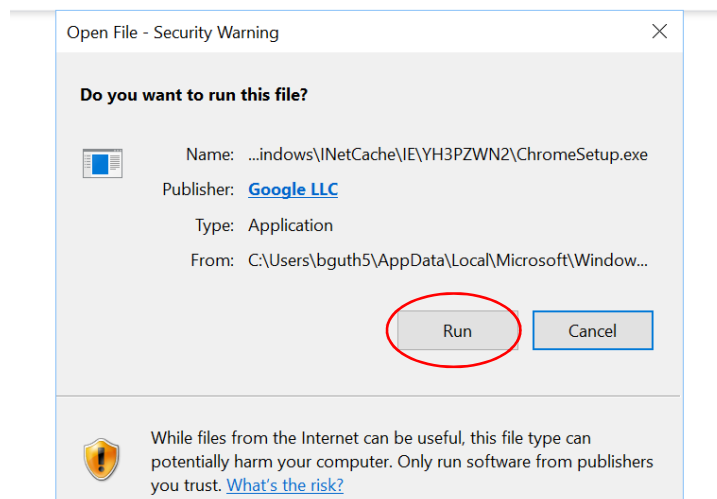

Click accept and install.

Select Run.

Then Run again. Allow the program to make changes on your device.

Once you have installed Google Chrome, use this browser to open the Sharepoint, by searching for mis, in Google Chrome, as per Mrs Ives's email tutorial.

https://www.youtube.com/watch?v=74C4_iwaUR4&feature=youtu.be

Please watch this tutorial for a step by step guide to getting your OneNote open and navigating through this platform. Please disregard the final minute of the tutorial which states that you are to be on your computer in real time; ie at the computer working in your maths OneNote during your timetabled maths lessons. This is no longer a requirement. You may now complete the work in your own time.

Hopefully this will work for you.

Good luck,

Mrs Guthrie ☺
