| Unit 7 – Statistics and Probability | *Students will apply a variety of mathematical concepts in real-life and purely mathematical situations. Through the proficiency strands - Understanding, Fluency, Problem solving and Reasoning - students have opportunities to develop understandings of:*  
  - Data representation and interpretation - construct stem-and-leaf plots and dot-plots, calculate mean, median, mode and range, compare a range of data displays, describe and interpret data displays using mean, median and range, identify and investigate issues involving numerical data collected from primary and secondary sources. | 4 weeks           | Assessed at the end of the term (see below assessment item) |                          |
| Unit 8 – Measurement and Geometry |  
  - Location and transformation - describe and create translations, reflections and rotations on the Cartesian plane, use appropriate conventions for naming transformed shapes, identifying a combination of transformations on the Cartesian plane. | 5 weeks           | Exam Short answer questions - Basketball scores and geometry | Week 8 Thursday 29th November |
